

- **Main page** containing all the things you asked for in the assignment, including nav bar, div, sections, made sure I organized/structured it well using CSS.
- Clean layout for responsive web design, including a footer (emphasis on user experience).
- Images of me and quick facts!
- Includes a “Download **CV**” button that will redirect you to an image of my CV using href

About me: I am a passionate student of Bachelor in Informatics at IMC Krems.

I love coding, sports and in general being productive among other things.

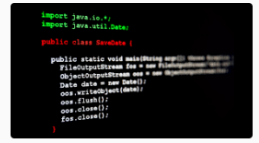

If interested look at my [CV](#) or [Gallery](#)

Chess — A hobby of mine that I wanted to pursue more actively but due to outside factors such as there not being stable income I decided against it I actively play on chess.com and have played 3 professional tournaments in my lifetime.

Karate — Due to quitting hockey as a young kid. I decided to take up karate as a new sport. Currently im recovering from an injury but will start training again - 2.11.2025

Programming — As programming is something I want to focus on during my lifetime, I have had experience mostly using Python, Java and partially C. One thing I have started to enjoy are the projects we have in HTML/CSS.
